Ram Steel Comfort

The shape of the back is what characterizes RAM. The harmonic lines and dropping curve on the slightly oversized back mimics the shape of a rams head and horns.

The RAM chair is created with the intention to make a dining chair that is flexible in its form and function so it will easily match different interiors and tables. ## METRO (KC04) - Designed by Mia Lagerman

With the METRO chair Mia wanted to make a simple yet comfortable wooden chair suitable for many types of rooms, contexts and styles. Light, shadow and simple shapes create a contemporary look, exploring a new take on a classic chair type. Looking out the studio window at a construction site of the new Copenhagen metro line the name came naturally, emphasizing an urban quality.

The METRO chair is characterized by the organic curved armrests and the back legs, which in an elegant way also serves as a comfortable backrest support.

VEIFA (KC05) - Designed by NUR design

Based on architectural principles and the Scandinavian tradition, the VEIFA Chair is an innovative take on a timeless idiom. The curved backrest embraces and supports the body, while the harmonic shape is an approach to the minimalistic design idea of "less is more".

Attracted to its elegant curves, this chair is an eye-catching piece of furniture that brings a light expression and yet a strong and solid construction. VEIFA is the Icelandic word for waving and this friendly gesticulation is the essential generator of this light and welcoming chair design.
